- ▶ BasWare Mobile provides access 24/7 to BasWare Purchase Management and BasWare Invoice Processing - no task needs to wait for your return to the office.

**When key people are out of the office, what happens to your organizations' financial processes? If budget holders aren't at their desks, are purchase requisitions and invoices left waiting until their return? If managers are on the road, is controlling spend or capturing early payment just a dream?**

Delays in the procurement and invoice handling processes cost your organization real money. A backlog of work waiting in the office prevents your staff from focusing on what really matters – managing the business. So why not use your traveling time more productively?

**Be in control - any time, anywhere.** BasWare Mobile delivers control of the financial value chain to smartphones and mobile devices. You can use BasWare Mobile to handle requisitions from BasWare Purchase Management (PM) and invoices from BasWare Invoice Processing (IP). You can work offline when connectivity is not available, then update all changes over a highly secure encrypted SSL link. Mobile access 24/7 ensures that no task needs to wait for your return to the office.

**Control purchasing on the go.** BasWare Mobile enables you to view and action a list of purchase requisitions waiting in the BasWare PM approval workflow. Item level information, including the cost allocation and requisition history, quickly gives you the detail you need to handle requisition requests without delay. All requisitions can be reviewed, approved, rejected or forwarded, allowing you to provide instant feedback on any decision. BasWare Mobile means there is no delay in getting important goods and services straight to your employees.

**Manage invoices on the move.** BasWare Mobile enables you to process invoices in the BasWare IP approval workflow on the move. Invoices in your task list are quick and easy to manage. The system provides detailed line by line access to invoice history and coding, to ensure you can accurately review or approve any outstanding invoice. BasWare Mobile allows you to avoid late payments and capture those important early payment discounts every time.

# Leading Solutions for Purchase to Pay Automation

## ► BasWare Enterprise Purchase to Pay Solutions for end-to-end financial processing

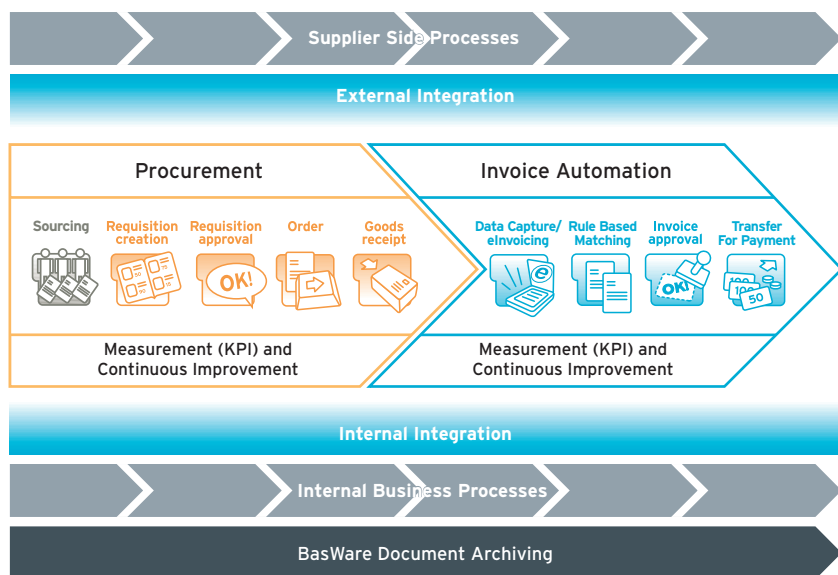

**BasWare Enterprise Purchase to Pay Solutions automate three main business critical processes: Purchasing, Accounts Payable and Travel and Expense Management of large and medium size organizations. The solutions deliver value in areas of control and compliance, fast return on investment and flexibility of packaged composite applications. BasWare solutions let you start small and think big, gradually building a high-impact, quick-to-implement end-to-end solution to fit your organization's needs.**

With BasWare, you realize greater return on your existing investments (ROeI) from core business and financial systems such as Enterprise Resource Planning (ERP), Accounts Payable (AP) and materials management. BasWare uses the information generated by these systems to feed its automated processes, adding value to your organization and making it easier and faster to manage process change.

BasWare integrates with over 100 different ERP and other business support systems. The company has achieved Microsoft's Certified for Windows Server 2003 certification and dual SAP certification for its BasWare anyERP Adapter. The "SAP® Certified Interface" and "Certified for SAP® NetWeaver(TM)" endorsements guarantee businesses seamless integration of BasWare's Enterprise Purchase to Pay applications with ERP systems.

In all, the BasWare suite provides an end-to-end financial processing solution that can't be matched by non-integrated manual or point software. BasWare's proven concepts have been enhanced over time, based on extensive input from our global customer base, to become the most cutting-edge Enterprise Purchase to Pay Solutions in the world.

### BASWARE ENTERPRISE PURCHASE TO PAY SOLUTIONS
