

basware

Ascent Xtrata Pro for Basware

Key Features

- Market-leading scan and capture application
- Innovative technology and functionality
- Optimal out-of-the-box recognition accuracy (up to 80%)
- Versatile recognition via learn-by-example, template design, and country-specific recognition libraries
- Support for centralized and distributed document capture
- Fast implementation
- Basware integration
- Easy maintenance with multi-language user interface
- Automatic notifications to suppliers (e.g. if purchase order number is missing)

SOLUTION ENABLES

- Freeform recognition
- Automatic line-item capture
- Learn-by-example technology
- Supplier template design
- Drag and drop functionality
- Automatic capture of email and fax invoices
- Recognition of Asian characters
- Time saving implementation

A SINGLE PLATFORM FOR ANY DOCUMENT TYPE

With Ascent Xtrata Pro for Basware you can perform image and content classification for documents, from forms to correspondence, with fixed or variable layouts. The solution also supports both template-based and free-form extraction for fixed forms and unstructured documents.

Scan and capture your invoices with greater accuracy and efficiency

Ascent Xtrata Pro for Basware delivers line level data and impressive recognition rates right out of the box. At the same time, it eliminates time consuming recognition templates and makes obtaining email and fax invoices more efficient.

Ascent Xtrata Pro for Basware is a single platform that enables automated data capture of invoices. The solution uses a combination of different technical approaches, including freeform recognition with up to 80% initial accuracy, and a learn-by-example non-template approach. Easy to use and flexible, Ascent Xtrata Pro for Basware can be optimized by non-IT specialists, and tailored through template design to handle exceptions for important suppliers.

IMPROVE MATCHING ACCURACY, REALIZE FASTER DEPLOYMENT

With flexible freeform recognition, Ascent Xtrata Pro for Basware is far better at capturing line-item level data than template-based technologies. Freeform recognition also uses artificial intelligence to handle minor differences or deviations in the received invoice. Through its learn-by-example capability, the solution continuously improves matching accuracy.

Ascent Xtrata Pro for Basware provides out-of-the-box, pre-configured components for fast deployment. You get one platform for structured, semi-structured, and unstructured documents,

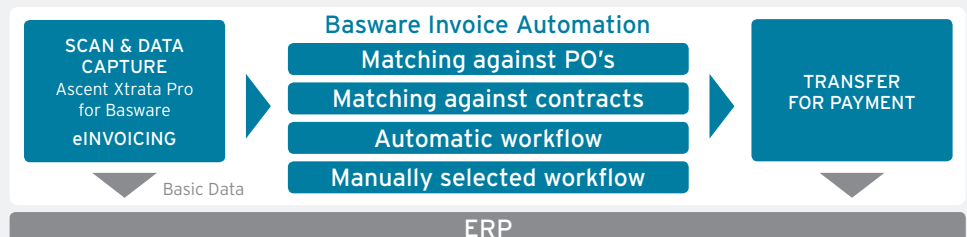

with classification by content and image. The solution also features intuitive user interfaces with multi-language optical character recognition, country-specific libraries, and comprehensive localization capabilities for complete international support.

EASY TO MAINTAIN, EASY TO EXTEND

The solution includes learn-by-example technology for classification and extraction, making it easier to maintain and extend than solutions built with templates and rules. With powerful statistical reporting and visual aids, results can be viewed instantly, enabling you to rapidly identify process bottlenecks.

Ascent Xtrata Pro for Basware supports continuous supervised learning, enabling you to re-train extraction and add new examples with the click of a button. To minimize extraction errors, data cross-validation is performed wherever possible. Pre-trained 'knowledge bases' deliver out-of-the-box extraction performance while reusable classification and extraction components enable rapid solution development.

End-to-End Invoice Automation Process

Basware - more than 1,000 customers in 40+ countries.

Enterprise Purchase To Pay

Key Features

CONTROLLED PERFORMANCE

- Comprehensive solution, supporting the entire EPP process
- Maximum automation with
 - Leading-edge scan and capture
 - Next generation rule-based matching
 - Powerful exception handling workflow
 - Automatic archiving
- Integrated key performance indicators (KPI) enable continuous process improvement
- Anywhere, anytime access with mobile solution
- Extreme robustness and simple integration - in even the most complex IT environments
- Compliant with de-facto IT standards

BASWARE

Basware is the global leader in purchase-to-pay solutions with more than 1,000 customers and 500,000 users in over 40 countries around the world. Basware solutions are distributed and implemented in Europe, the US, and Asia-Pacific through an extensive network of Basware offices and business partners.

www.basware.com

The leading solution for purchase-to-pay automation

Gain maximum benefits by streamlining your entire purchase to pay process. Basware Enterprise Purchase to Pay solution automates three key support processes: procurement, accounts payable, and travel & expense management.

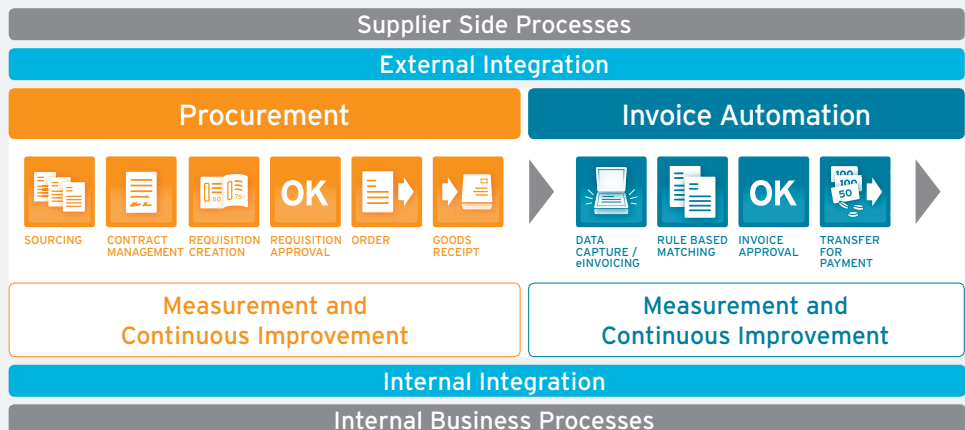

Basware solutions deliver value by providing compliance and control, as well as fast return on your investment. Built-in intelligent process automation and powerful exception management increase efficiency and reduce costs. By choosing Basware you can think big but start small - our packaged composite applications provide step-by-step guidance to help you build a high impact end-to-end solution that fits your organization's needs.

Basware's Enterprise Purchase to Pay solution offers easy implementation and roll out.

Basware is compatible with over 200 ERPs and has certified integration with all leading ERPs on the market. Microsoft's "Certified for Windows Server 2003", "SAP® Certified Interface", and Certified for SAP® NetWeaver™ certifications and endorsements guarantee seamless integration with Basware Enterprise Purchase to Pay Solution.

Basware's suite provides a global solution for purchase-to-pay automation that cannot be matched by any other workflow solution or ERP.

End-to-End Support for Purchase to Pay Process
